Kalaburagi, Karnataka, India

Career Objective

Motivated AIML Undergraduate seeking an Entry-Level opportunity in Cloud Engineering where I can apply my knowledge of AWS, Cloud Computing, and Security Fundamentals to build scalable, secure, and efficient Cloud solutions while continuously enhancing my technical expertise.

Education

Poojya Doddappa Appa College of Engineering B.E. in Artificial Intelligence & Machine Learning CGPA: 7.02 (5th Semester)	2023 – 2027
Gurukul PU College of Science, Kalaburagi Pre-University (12th Grade)	2021 – 2023
New Noble Boys High School, Kalaburagi SSLC (10th Grade)	2010 – 2021

Technical Skills

Programming: Python (Basic), C++, SQL (Basic)

Cloud: AWS Cloud Practitioner (Pursuing), EC2, S3, IAM (Beginner Level)

Tools: Git, GitHub, VS Code, Jupyter Notebook, Arduino UNO

Core Knowledge: Linux Basics, Networking Fundamentals, Embedded Systems

Projects

Arduino-Based Radar Detection System

Technologies: Arduino UNO, Ultrasonic Sensor (HC-SR04), Servo Motor, C++, Embedded Systems

- Developed a Radar Detection System using Arduino UNO and Ultrasonic Sensor to detect objects in real-time.
- Implemented distance measurement and angle-based scanning using Servo Motor rotation.
- Displayed object detection data through Serial Monitor/Processing Interface.
- Designed and tested hardware connections for accurate object tracking and system stability.
